YETER MAKİNA

ABOUT US

Founded in 1990 – OSTIM Industrial Zone, Yeter Makina started to manufacture some parts and mechanical systems after machining-purposed productions. Over the years, Yeter Makina focused on the manufacturing of special purpose machine and equipment as a result of R&D studies and sector experience.

Today, Yeter Makina is a company that uses more technology, cares about automation and aesthetic during production, and manufactures full-scale system instead of part manufacturing, and offers solutions that meet the needs. In addition the manufacturing, Yeter Makina provides services for testing, assembly, shipment and software and also has the capability for system design and turnkey projects. Yeter Makina today serves 1.500 m² closed area and owns ISO 9001: 2008 quality certificate.

Since 2014, Yeter Makina has a system partnership with FESTO, which is a world leader in automation technology procurement, industrial control, vocational education and training programs.

VISION

To direct technological solutions, as a well-known company in the sector, Turkey and throughout the world.

MISSION

To offer advanced solutions that meet customer needs and expectations, as a result of innovation and R&D studies, and designing & manufacturing special purpose machines.

CORE VALUES

- To create value
- To add quality to employees
- Continuous improvement
- Work ethic
- Honest work
- Focused on innovations
- Customer satisfaction

SYSTEM PARTNERSHIP

FESTO

Since 2014, Yeter Makina has a system partnership with FESTO, which is a world leader in automation technology procurement, industrial control, vocational education and training programs. In accordance with the partnership agreement, it is targeted to introduce FESTO brand and Yeter Makina to region we affiliated with.

As a solution partner, we keep working with FESTO.

30 YEARS OF EXPERIENCE IN MACHINERY MANUFACTURING

FULL AUTOMATIC SERVO CONTROL MASK MACHINE

- ◆ The machine, designed and manufactured by us, produces surgical masks, 3-ply, with rubber and nose wire fully automatically and swiftly.
- ◆ Our fully automatic surgical mask machine is Servo and PLC Controlled and has ergonomic easy-to-use control panel.
- ◆ All equipment used in our fully automatic surgical mask machine, designed and manufactured by us, is in European standards and has CE certificate.

- **Capacity:** 72-78 Pcs/Pin.
- **Dimensions:** 3.400 mm x 4.000 mm x 1.900 mm
- **Weight:** 850 Kg
- **Operating Voltage:** 380 V
- **Power Consumption:** 11 kW
- **Air Pressure:** 6 Bar

➤ Equipment Used in the System

- | | |
|----------------------------|------------------------|
| Servo motors and drivers | : Festo |
| Motion PLC | : Festo |
| HMI display | : Festo |
| Pneumatic equipment | : Festo |
| Panel switchgear materials | : Siemens / Weidmuller |

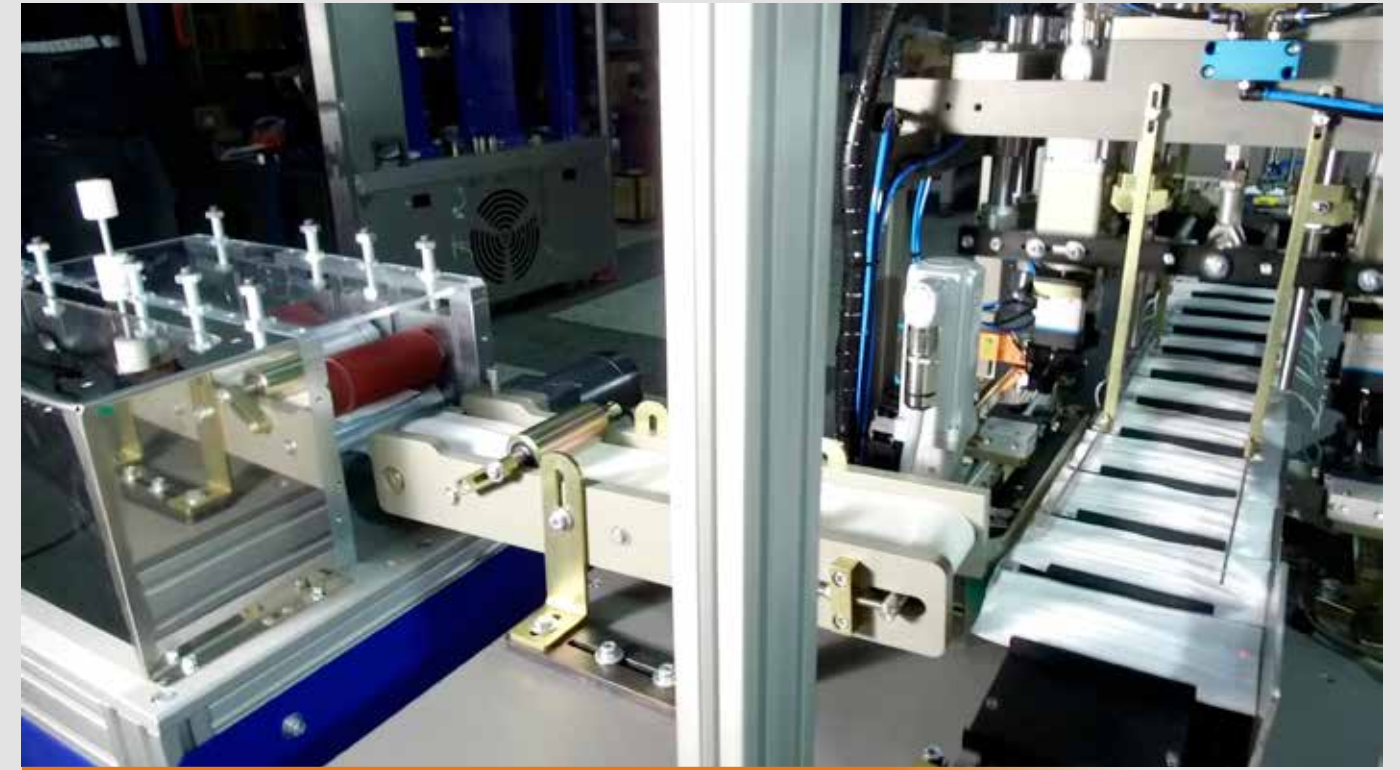

➤ FULL AUTOMATIC
SERVO CONTROL MASK MACHINE

Production of superior quality products

Superior motion control with cutting edge servo systems

Smooth and ergonomic harmony between systems

*Mask machine produced with
30 years of experience, ergonomic design
and products having
today's latest technology*
