Ostim Medical Industry Cluster

The OSTIM Medical Industry Cluster is an association established to strengthen cooperation among manufacturers operating in the medical industry in Türkiye. It aims to improve innovation capacity, production capabilities, and international competitiveness through a collaborative and export-oriented cluster model.

The Cluster focuses on supporting research and development, technology transfer, and knowledge sharing, while encouraging joint projects among its members and with external stakeholders. It actively promotes international cooperation, facilitates access to global markets, and supports companies in developing sustainable and high value-added medical technologies.

Through these activities, the OSTIM Medical Industry Cluster contributes to the development of the healthcare ecosystem and the long-term growth of the medical technologies industry.

As a non-profit organization, OSTIM Medical Industry Cluster is committed to building strong national and international partnerships that create concrete opportunities for its members.
